FOOTNOTES FOR B.A. CHEMISTRY STUDY PLAN

1. All B.A. majors must complete mathematics at least through MAT 291 (Calculus II). Depending upon the individual mathematics background*, some students may start with MAT 150 rather than MAT 151 and extend the sequence of math courses by one semester. Others may start with MAT 191. Majors are strongly advised to elect additional advanced mathematics courses. (*See http://www.uncg.edu/mat/undergraduate/mathplacetest.html)

2. If the student is able to begin Foreign Language at the intermediate level in the Freshman Year, a second year of language may not be required. The requirement is Foreign Language through the Intermediate (204) level.

3. The sequence listed here for meeting the General Education Requirements (GEC) and College Additional Requirements (CAR) (identified by capital letters in parentheses) is a suggestion only and may be arranged to fit each student’s particular situation. Note: Four Writing Intensive, two Speaking Intensive, and four Global (including one nonwestern) marker courses must be completed.

4. The only difference in the B.A. and B.S. programs in the first two years is the PHY 291-292 requirement for the B.S.* The B.A. student may take PHY 211-212. Should the B.A. student switch to the B.S. program after the sophomore year, one advance Physics course will be required; PHY 321 Modern Physics, is suggested. *(MAT 191, Calculus I, is a prerequisite for PHY 291.)

5. Electives may be taken in any area, including chemistry, related sciences and mathematics. Students may not count more than 60 hours in Chemistry and related areas toward the 122 hours required for graduation. Additional hours may be taken in the major and related areas, but the number of hours at graduation will increase accordingly. CHE 491, 492 Independent Study is encouraged.

6. Only chemistry and Related Area Requirement courses in which grades of C- or better are earned will be counted toward the major. A grade of C- must be earned in a prerequisite course before taking the subsequent course.

7. Two courses from among CHE 420 or 556 and 557 (which count as one course), 442, 481, and 531, 536, or 553 must be chosen as Chemistry electives. CHE 533 Instrumental Analysis Lab need not accompany CHE 531 Instrumental Analysis Lecture, but may be elected.

8. Senior Chemistry majors should register for CHE 401 in their second last semester and attend seminar, whether or not they plan to present a seminar this first semester. All must register for CHE 402 in their last semester. A grade will be given in the second semester, based on presentation and attendance in CHE 401 and CHE 402. Juniors are encouraged to attend.

Major Requirements
1. CHE 111*, 112*, 114, 115, 331, 333, 342, 351, 352, 353, 355, 401 (audit), 402, 406 or 461
2. Two courses from among: CHE 420 or 556 and 557 (which counts as one course), 442, 481, 531, 536, 553

Related Area Requirements
1. Mathematics 191, 292
2. Physics 211, 212 or 291, 292
