\* Starting Fall 2025, the MDEQ (Diversity and Equity) marker will be replaced by the MCC (Civics and Community) marker. However, students in the 2024 or earlier catalog years who have not completed their MDEQ requirement are no longer required to do so. They may take any 3-credit course as an elective instead. As a result, these students will need only 10 MAC competencies instead of 11. If a student has already taken a course with the MDEQ marker, it will count as their elective.

## FOOTNOTES FOR B.S. CHEMISTRY STUDY PLAN

1. All BS majors must complete mathematics through at least MAT 296 (Calculus B). Depending on their individual mathematics background, some students may start with MAT 190 instead of MAT 196. MAT 190 is a one-semester precalculus course for science majors. Based on their scores on the Calculus Readiness Diagnostic Test (CRDT), students will begin their calculus journey in different math courses:

- High score: MAT 196
- Medium score: MAT 196 + MAT 181
- Low score: MAT 190
- Lower score: MAT 115 or MAT 183

See details here: <https://mathstats.uncg.edu/undergraduate/placement/calculus-diagnostic-test/>

2. **BS students (0-6 hours) – Language and Culture** can be satisfied in one of these three ways:

6 hours of additional language coursework related to a single language, between the 101-204 level, depending on their starting point in the language	3 hours of additional language coursework, between the 101-204 level, depending on their starting point in the language, and a CIC Culture course	6 hours of CIC Culture courses

3. The sequence listed here for meeting the Minerva Academic Requirements (MAC) and College additional requirements (CIC) (identified by capital letters in parentheses) is a suggestion only and may be arranged to fit each student's particular situation. Note: Two College Writing courses must be completed.

4. Only major requirement and related area requirement courses at or below the 300-level in which grades of C- or better are earned will be counted toward the major. Students must earn a C- or better in prerequisite major requirement and related area requirement courses before advancing to subsequent courses. Students must have an overall GPA of at least 2.0 in CHE courses at UNC Greensboro.

5. General Electives may be taken in any area, including chemistry, related sciences, and mathematics.

6. Chemistry and Biochemistry majors can register for CHE 401 any time after achieving junior status. All must register for CHE 402 in their last semester. A grade will be given in the semester CHE 402 is completed, based on presentation and attendance in CHE 401 and CHE 402. All majors are encouraged to attend seminar even if not registered for CHE 401 or CHE 402.
